SOFTWARE DESIGN AND MICRO SERVICES

PROJECT TITLE:		
Ikot-When? - A Microservices Based Smart Campus Shuttle Digital Information System for DLSU-D		
GROUP MEMBERS:		**INDIVIDUAL GRADE PRESENTATION (10%)**
DIZON, CHYNNA GAYLE H.	*10*	
PEDROZO, YIANNIS L.	*10*	
	10	
DOCUMENT		**GROUP GRADE (25%)**
Chapter 1: Problem, objectives, scope, significance, and background are complete, clear, and highly relevant to the web application.	*5*	
Chapter 2: Review of Related Literature and Studies (RRL) Comprehensive, updated, and properly cited references supporting the study.	*5*	
Chapter 3: Methodology Methodology is complete, detailed, and appropriate for web application development. System architecture, flowcharts, ERD, UML, and development process are complete and accurate.	*5*	
Chapter 4: Results and Discussion Features, testing, screenshots, and results are complete, organized, and functional. Thorough testing with clear interpretation and evaluation results.	*5*	
Chapter 5: Conclusion and Recommendation Conclusions are logical and recommendations are realistic and relevant.	*5*	
WEBSITE DEVELOPMENT APPLICATION		**GROUP GRADE (65%)**
1. **Login and Security Module - Secure login system with authentication, validation, password protection, role-based access, and error handling functioning perfectly.**	*5*	
2. **System Features and Functionality - All required system features are complete, functional, accurate, and user-friendly.**	*5*	
3. Data Analytics Dashboard - Dashboard displays accurate, organized, interactive, and meaningful analytics with charts/graphs.	*5*	
4. Generated Reports - reports are accurate, complete, downloadable/printable, and well-formatted.	*5*	
5. Audit Log and Activity Monitoring - Audit logs accurately track user activities, timestamps, and system actions effectively.	*5*	
6. User Interface and Design - Interface is professional, attractive, responsive, and easy to navigate.	*5*	
API		
7. API Design and Architecture - APIs are well-structured, RESTful, scalable, and follow proper microservices architecture principles.	*5*	
8. Microservices Functionality - All microservices function independently, communicate properly, and handle requests efficiently.	*5*	
9. API Integration and Communication - Excellent integration between frontend, backend, and external services using APIs.	*5*	
10. Performance and Scalability - APIs respond efficiently under load and demonstrate scalability.	*5*	
11. Database and Service Management - Efficient database handling, service coordination, and data consistency across microservices.	*5*	
CLOUD SERVICES(PLATFORM AS A SERVICE)		
12. Website Deployment - Website is fully deployed online and accessible without errors at all times.	*10*	
TOTAL	**100**	

COMMENTS AND SUGGESTION/S:
